Tonya Roy, CPhT
2200 E Washington
Bloomington, IL 61704

Dear Ms. Roy:

Thank you for your inquiry regarding the refrigerated and room temperature stability of Lorazepam Injection, USP, Hospira, Inc.

According to the current approved package insert, Lorazepam Injection, USP should be stored protected from light and under refrigeration, 2° to 8°C (36° to 46°F). Adherence to the storage condition is strongly recommended for shelf-life of the product.

Stability testing on all Lorazepam Injection, USP configurations stored at room temperature (25°C or 77°F) has demonstrated product purity and potency to remain within specifications for up to 3 months; testing beyond 3 months was not performed.

In-house data

1. Data on file, 97d-034-AP-92-R1. Abbott Laboratories.
2. Data on file, 00005049. Abbott Laboratories.

I hope this information is helpful. If you have any further questions, please contact Hospira Medical Information at 1-800-615-0187 or e-mail us at medcom@hospira.com.

Sincerely,

A handwritten signature in black ink that reads "Katie E. Anderson".
