TO: All MCAEMS Agencies and Members

FROM: Cathy Belcher RN, BSN
Quality Assurance Coordinator

RE: GEAC Updates

I have updated GEAC on a few issues to help with documentation of EMS runs. The changes I have made are:

- Ativan has been added as a medication treatment.
- Combi-tube and C-Pap are both added under Airway Device.
- Combitube has been added under Airway Access
- 12 lead EKG has been added under EKG Procedure and needs to be marked anytime a 12-lead is done.
- Please mark Stroke Screen under the Assessments screen and under the EMT who performed the stroke screen.

Accurate and thorough documentation will help me with quality reviews, but it also gives a complete picture of the patient care performed if the run were to go to court. Please look for these changes whenever you are filling out your next report.
